

Please stop the NAB from removing XM Radio's first ammendment right to free speach. They have the constitutional right to broadcase local weather and traffic information. This right allows for competition in the market place, something the NAB is trying to stifle. Allowing the NAB to succeed in this attack against it's competition will create a monopoly for them. I support competition and free enterprise, I support the first ammendment right to free speach, and I support XM Radio's right to broadcast this vital information that could save lives.Sincerely,
Thomas Bridgman
